Diamond Class

Our learning: ENGLISH

We have started reading our class book “The Firework Maker’s Daughter “ and the children are really enjoying this modern day fairytale . The heroine, Lila sets off on a quest to find the Royal Sulphur which will enable her to become a proper Firework Maker. Hopefully the children’s interest in the story will provide a great stimulus for their own creative writing in the coming weeks.

MATHS : This week, our maths focus has been on recognising and describing the properties of quadrilaterals. We started off by practically investigating the shapes and our main aim has been for the children to use mathematical vocabulary when describing the properties .You may well have seen the sheet I sent home mid week to help the children with this learning and it would still be a good idea to go through it again for consolidation.

Reminders :

- Every Tuesday I will set Mathsletics and Bug Club home learning . Please check your child’s progress on this as a few children have several outstanding homeworks.
- Trip letters have been sent home this week and helpers will be needed .

Mrs Moncrieff
