

13<sup>th</sup> May 2022

Here are some photos from our trip to UWE's School of Engineering. First, we took part in a workshop in the Prototype and Play Lab involving data collection. We then got to meet Pepper, a robot who did some very funny things! After eating lunch in the sunshine we had a tour of the School of Engineering building and were fascinated by the technology. There were plane and car simulators, 3D printers and a virtual reality room! The children were all fantastic ambassadors for our school, demonstrating their curiosity and asking some fantastic questions.

Have a lovely weekend,

Mrs Newcombe
