

Diamond Class

13.03.20

We had a great day at the Bristol Museum, exploring the Egyptian gallery and becoming archaeologists during our workshop. It was fascinating to see all the items on display and identify objects that we have been learning about, particularly related to mummification.

In English we have been using a picture book called Journey by Aaron Becker as inspiration for our own stories which we will be writing next week. Developing our oracy skills, we worked in groups to retell the story to the class, using only the images as prompts.

In Maths we have been learning about decimal numbers: dividing by 10 and 100, finding equivalent decimals to fractions and comparing decimals. Next week we will be rounding decimals to the nearest whole number and problem solving with measurement and money.

Reminders:

- Continue to practise times tables – I will be holding a meeting about the Multiplication Check Test during the first week back after the Easter holiday (date and time to be confirmed).
- Read at least 5 x a week
- Mathletics homework
