Diamond Class

**We raised £133.31**

We were very excited to find out that we had raised such a large amount of money for this charity. Thank you for your kind cake donations and an extra special thanks to the girls whose idea it was in the first place and who organised the event.

Our learning:

Every morning this week, children have practised recalling both their times tables and

division facts. It has been amazing to see how the children have improved their speed since Monday and how they have grown in self-belief and confidence. Our aim is to continue to do this so that the children enter Year 5 having secured all the tables up to 12s. In maths, they have also looked at using their knowledge of numbers to reason, problem solve and apply skills they have learnt over the year.

We have linked English and geography by researching information on volcanoes and then shaping this into an information text. Our learning has been brought to life by the recent volcanic eruptions in South America.

The pictures below show the children exploring texture, colour and design by weaving natural materials.
