Diamond Class Newsletter

We had a wonderful morning at KLB completing a range of science activities including making ice cream, exploring Cartesian divers and investigating water in a pirate themed session. The morning ended with a short science show from some of the Y12 pupils who had organised the whole morning. Thank you for taking and collecting your children from KLB – they had a brilliant time.

Coming up next week - Learning

In maths we will be looking at sorting diagrams including Venn diagrams, revising various other maths concepts while using these.

In English, we will be writing our additional chapter stories linked to The Train to Impossible Places.

Way to support at home

- Read at least 5 times a week. Please ensure reading is recorded in the reading record books each week.
- TTRS - regular practise is still important even though we've completed the multiplication check.
- Spellings

This week's spellings are: thought, through, various, weight, woman, women
