

# Emerald News

In **Art** this week we were learning about facial expression. Using the mirrors we looked at our own faces to see how our faces change to show different emotions. We then applied our pencil drawing skills to have a go at showing facial expressions.

In **Maths** we have started our learning about angles by making geostrips to create and compare angles. Over the week we've been learning about right angles and comparing other angles to them. We've begun to introduce the language of acute and obtuse angles.

In **English** we used our plans to write our poems in our books before writing the final pieces onto plain paper using guidelines. We have moved onto illustrating our poems.

In **DT** we were excited to final start building our egg carriers. We worked in our teams to follow our designs carefully before using test plastic eggs to check our creations. We are looking forward to testing the carriers out with real eggs next week!

In preparation for the **Christmas fair** we made signs for our stall and helped Mrs Ward by cutting the Christmas shaped shortbread biscuits. The whole corridor smelt delicious!

Have a lovely weekend. Mrs Grainger
