

Emerald News

In **Maths** we have started our learning about multiplication by recapping the methods we can use to solve multiplication questions. We enjoyed making links between tables we know and multiples of 10, realising that as we know our 4 x table we also know our 40 x table. We will be applying these skills to solve more complex multiplication questions next week.

In **English** we have started our new text 'The Boy Who Grew Dragons' by Andy Shepherd and have enjoyed making predictions and discussing the pros and cons of having a pet dragon.

In **DT** this term we are learning about healthy and varied diets which links closely to our **Jigsaw** puzzle piece, Healthy Me. This week we conducted a sensory evaluation of different veggie toppings for pizza, the children were really enthusiastic about this; some might even have a new favourite topping to try at home!

We have also begun our **Geography** learning which will focus on place knowledge, especially countries within Europe. We began by recapping what we could remember from Year 2 about the continents of the world. This knowledge varied greatly and we will need to continue to build upon this.

Our home learning for this term has been set on Google Classroom and will support your child to further their knowledge of continents and countries of the world.

Of course Thursday saw us celebrating **World Book Day**. We started with an assembly to get us into the day, which was brilliant to be able to all come together as a school. Back in class we shared our favourite book characters and took part in the CBBC live lesson – a very busy but enjoyable morning.
