

Emerald News

This week in Emerald class we enjoyed a *Let's Sing* lesson led by a specialised music teacher. Alongside singing we practiced keeping a steady beat and had a go at keeping that beat with drum sticks too. We're all looking forward to the next lesson next week!

In Maths we have been continuing our learning about place value. The children have been building on their knowledge to compare, convert words and order three-digit numbers. Some of the children have mentioned that they have been doing their **Mathletics home learning – new units will be set each Monday.**

In English we have been recapping our understanding of possession and have been using apostrophes to show this in our writing. We have continued sharing our class text *George's Marvellous Medicine* and have been enjoying finding out all the things that George put in.

In Science we have started our learning on animals including humans. This week we focused on skeletons and enjoyed finding out about the three different types of skeleton and thinking about what animals have which type of skeleton and why.

All the children will have now brought home their reading book and reading record (green book), please make sure the children are reading 5 times over a week, ready to be checked each Friday.

Don't forget next Thursday is our trip to cattle country!

Have a lovely weekend.

Mrs Grainger
