## 20.4.2018 – Term 5

### What have we been learning?

This week the children have been focusing on 2D shapes and how many sides and vertices they have. Also in maths the children have started to calculate what change the three little pigs needed when they bought materials for their houses.

This week the children became dragons and spent days in dragon school to help write diary entries. We have started to practise keeping a steady beat and putting accent on a single beat to work towards one of our mini outcomes.

**REMINDER:** We are still celebrating reading five times a week on different days. The children have received certificates this term for reading 5 times every week. The children also get 2 house points for reading 5 or more times a week.

### Next Week

Continue to find change and exploring a new book. Learning dance moves and continuing with directions and algorithms.

### Dates for you Diary

**Multi skills event – 3<sup>rd</sup> May 2018**
