

Emerald Class Newsletter

4.5.2018 – Term 5

What have we been learning?

This week the children thoroughly enjoyed building their clay models with a visitor from Aardman! Our class learnt the skills to create Shaun the Sheep.

We have also started learning about fractions and what half an object, shape or quantity looks like. This will continue next week and we will look into quarters of an object, shape, or quantity. In history the children were excited to learn about knights and compared the similarities and differences to the past and present.

The multi skills event at KLB was brilliant, the children all joined in the activities run by the students at the school with enthusiasm. Thank you to the parent helpers that offered to help and supported us on the trip.

Next Week

Frog has gone missing so we need to create posters to find him. Continuing with fractions and continuing learning about the UK capital cities. In science we will be exploring a variety of wild and common plants.
