

Emerald News

In **English** this week we have enjoyed finding out about the features of leaflets and have been applying these to our own informative leaflets. Our leaflets are one of our project outcomes so we have been working really hard and they are looking fantastic! We are looking forward to sharing them with you next week.

In **Maths** we have been learning about statistics; making pictograms, frequency charts, tally charts and bar charts. We have been learning the skills to read and interpret these different ways to present data as well as creating our own.

In **Computing** we used our knowledge of branching databases from last lesson to create one using a computer program.

In **RE** we have been learning about what different people believe about God. Last Friday we focused on what Muslims believe about Allah and learnt that there are 99 different names. We listened to some of the names and read the meanings before creating free frames to represent some.

Dates to remember:

Parents evening appointments on Monday 4th and Wednesday 6th April

Wednesday 6th April, 2.45pm - join us for our end of project outcome to see our fantastic learning.

Have a lovely weekend, Mrs Grainger.
