

# Emerald News

In **Maths** we have been building on our knowledge of 10 more and less but have been applying the skills to larger numbers within 1000 and learning about how we can exchange one hundred. We have also been learning to find 100 and less using the dienes to help us with large numbers.

In **English** we have been busy writing our newspaper reports about the morning on Kranky Farm when Grandma has the marvellous medicine and grows through the roof. There are some tricky skills and structure to a newspaper but the children have been working hard to present their work in this style. In **Computing** we have typed up our headlines and by lines of our newspapers and have been using our media skills to change the font size, colour and style to make sure they stand out and grab the reader's attention.

In **Science** we have started our learning about nutrition by sorting different foods onto the Eatwell plate. We had lots of discussions about where each food belonged and the different minerals that foods provide us.

Have a lovely weekend.

Mrs Grainger
