

Emerald News

This week we have enjoyed seeing how our beans have been growing in their window bags. Most of our beans have now got roots and we even have some shoots beginning to grow. We used magnifying glasses and microscopes to have a good look and were amazed to see the tiny 'hairs' on the roots!

Now we have seen the roots grow we thought it was time to move our beans into pots. We enjoyed planting these outside in the garden whilst the sun was shining.

In DT we have been exploring different ways to join to make a very simple bridge using 3 pieces of cardboard that would stand up without support. We explored joining using pva, glue sticks and masking tape. Next term we will be planning and making our own structures using what we have learnt about joining.

I hope you have a lovely break and that the sunshine continues!
