

Emerald News

In **English** we have continued being creative and have used our character and setting plans to draw story maps of our own plots. We have spent lots of times thinking about and orally rehearsing using story telling language ready to write next week.

In **Maths** we have continued our learning around measures, learning to find equivalent measures with different units and solving multistep problems using length. We have ended the week exploring mass, reading scales to find weight in kilograms and grams.

In **DT** we have been working on our lever pictures and we have all the pieces ready to construct them next week.

In **Jigsaw** we have been learning about the physical changes to both the inside and outside of boys and girls bodies. The children have all been really mature and sensible during our discussions and learning activities.

With not long left in Year 3 the children have been reflecting on their year and thinking ahead to the exciting move to Year 4. The children are looking forward to their transition sessions next week where they will spend time in their new classrooms with their new teachers and teaching assistant.

I hope you have all seen that we will be sharing our project outcomes with you on **Monday 18th July at 2.45pm** – hopefully we'll see lots of you there.

Enjoy the sunny weekend.

Mrs Grainger
