What have we been learning?

This week we have been exploring our class text 'Toys in space', we have been orally retelling the story in detail using actions and creating word banks to identify new vocabulary in the book. You can watch us orally retelling the story on Google classroom next week.

In DT, we explored a variety of joining techniques that we could use to make our puppets, stapling, glueing, threading and using a simple running stitch. We also investigated different puppets we have in school. We drew our favourite puppet and thought about the materials they were made from, the fastenings and joins it used and who we thought the puppet was made for.

In maths, we developed our money skills; we identified coins and notes, used different combinations of coins to make an amount and added coin value to find the total.

Next Week

In English, we will be creating our own story maps of the text 'Toys in Space' retelling the story using pictures and phrases.

We will continue to develop our understanding of money in Maths.

In DT, we will be making our own card templates for our puppets and making mock ups using dipryl material.

Our Jigsaw theme this term is 'Dreams and Goals', next week we will be discussing how to work well with a partner and we will celebrate our achievements with them.

Home learning

Mathelctics learning has been allocated today focusing on money. Please support your child to complete the learning. You can also use coins and notes at home with your child or when shopping to develop their understanding of money.
