What have we been learning?

In science, we have been learning all about the life cycle of a sunflower, we were able to use scientific language like stem, bud, shoot, roots, seedling, petals, germination etc to explain what happens at the different stages of the life cycle. Can your child use the life cycle below to describe it to you?

We also made the second observation of our bean seeds, that we planted last week and some of us were delighted to see some roots and even a few shoots!

In maths we have been continuing to look at 2D and 3D shapes, ensuring that we know all of their mathematical names and properties.

In English, we watched a very exciting video clip about Queen Elizabeth on her coronation and discussed what happened on that day along with all of her feelings as she became queen.

Next Week

In English, we will become Queen Elizabeth for the day and write a diary entry as if we were her on her coronation day. We will be thinking carefully about the tenses we use as we are writing about something in the past.

In DT, we will be making our designs for our patchwork quilt for our mini outcome 'Will the Queen like it?'.
Queen like it?'

Through our science, we will be helping the gardener at Buckingham Palace to make sure he knows everything he needs to keep all the plants and flowers alive!

Other News

We are practising really hard for our sports day on Tuesday 21st May 2019 and hope that you will all be able to join us from 10am for our races.

For our patchwork quilt, we would really appreciate any off cuts of material you may have at home which we could use to make our own patchwork quilt. Please send them to school if you have any.
