What have we been learning?

We loved you all coming to our coffee morning to share our space learning and we raised an amazing £55 for Children in need. Mrs Ward took the children's donated toys to the local charity shop in Yate who were very grateful for your child's old toys.

Thank you for all being so generous, it was a lovely morning and we hope you all enjoyed it. We have attached a link to be able to watch the space movement dance and Tim Peake song.

We have been putting the finishing touches to our moon buggies in DT, following our designs to add the important parts using tin foil, cardboard and wood.

In English we have started our final mini outcome which is to retell the story of 'Toys in Space' in our own words applying all the grammar skills we have been thought over the last two terms. We have become story tellers using our story plans and enjoyed hot seating being different characters from the story.

In maths we have been using the number line method to add and subtract two digit numbers and ones.

Next Week

In English Jet class will be writing the build up, problem and resolution of their toys in space stories.

In maths we will continue to develop addition and subtraction written methods.

We will be practicing our Christmas play 'Donkey for Sale' developing our speaking, listening and singing skills.

Important information

The children are still finding it tricky to mentally recall their numbers bonds to 10 and 20 and double numbers. Please use the attached link to practice these skills at home. It is vital that they are confident with these number facts as we use them daily.
