

Jet Class Newsletter

What have we been learning?

This week in Jet class we have been busy using our ELLI powers of imagination and stickability to write our own twists on Hansel and Gretel.

We have also created a database using textease software, and worked in teams to find out information and record this in tables and graphs.

In Science we have been concluding our sunflower investigation, where we found out what plants need to survive and why. We also had a visitor from the Send a Cow charity, who worked with us to explore why villages to Africa find it tricky to grow plants and what can be done to help.

We have been working hard to complete our amazing felt owls. Thank you so much to those who were able to come and help!

The year 5s have been working with us to develop their sports leadership award, where they come up with playground games they can set up and lead during lunch times. Take a look at some of their ideas! We had so much fun!

Jet Class Newsletter

Next Week

We will be commenting on and researching different designs and flavours of ice-lollies, ready to design and make our own for our enchanted forest project outcome.

We will also be presenting our very own shows about how to grow plants to Emerald class, following our story boards.

We will also be practising our Hansel and Gretel song with our own music to perform during our Enchanted forest project outcome.

Important information

PLEASE ENSURE YOUR CHILD HAS SUNCREAM APPLIED, A SUN HAT AND WATER BOTTLE IN SCHOOL DURING THIS HOT WEATHER.
