What have we been learning?

Over the last 3 weeks, we have been working on developing our place value skills in Maths. We have used different methods to partition numbers into tens and ones. We have used the part- whole model as well as using concrete objects to represent the different parts of the number.

In Science, we have been thinking about all of the animals in the jungle and what all living things needs to survive. We talked about the importance of water, food, shelter, oxygen and sleep. Some of us also thought that love was something that everyone needed to help them in life.

Next Week

In English, we are going to be using all of our homework findings to help us write a fact sheet for our mini outcome "Who am I?". The children will be using the features of a non-fiction report including headings.

In Art, we will be continuing to work on our jungle collages.

In Music, we are exploring the instruments as we begin to construct our own piece of jungle music, to see which instruments might remind people of different animals.

In Maths, we will be continuing to build on our knowledge of using the $<$ $>$ $=$ signs when solving problems.

Other News

- All children have 2 place value activities to complete on Mathletics this week.
- Next Wednesday, 27th September, please could your child bring a small bag of recycling into school, for them to sort as part of our learning around the world and recycling. Please ensure anything sent into school is safe and clean for the children to touch.
- At meet the teacher, we mentioned how it would really help us if you could come and stand near the low wall or garage at the end of the day so we can safely match your child to you.
