

Jet Class Newsletter

We started our week with a special visitor Dr Morley! She came into school to talk to us about her job as a scientist and her search for the giant, Arctic jellyfish. We asked her lots of curious questions and then helped her to write 'missing' posters to help her find the jellyfish. In maths we have been carrying out lots of practical maths through measuring. We have been measuring capacity in millilitres and litres and weight in grams and kilograms. We have been comparing and ordering measures. In science we completed our investigation into how plants grow by writing our detailed conclusions. In P.E the girls have been lucky enough to have Ali Dixon from KLB school in to teach them football skills and we have also been practising our skills ready for sports day. In Art we have been learning about the famous artist Andy Goldsworthy and creating our own natural sculptures outside.

Key dates coming up:

Sports Day - Wednesday 22nd May (AM only)

Last day of term - Friday 24th May

Coming up next week

In English we are writing diary entries in role as Dr Morley from our class text. We will be using different sentence types including exclamation sentences, questions, statements and commands.

In Maths we are moving on to telling the time (revisiting quarter to and quarter past the hour). We will be using this knowledge to problem solve and reason.

Our Jigsaw theme this term is 'Relationships' we will learning about relationships in school and at home.

Way to support at home

Your child will be coming home with a timetable practise book. Inside you will find the 10 times table, please support your child to learn these number facts but in a random order as this is how they will be assessed in school. We will be assessing the children each week on a Friday.

Please support your child to tell the time on an analogue clock. (o'clock, half past, quarter to and quarter past)
