What have we been learning?

It's been another hot, sunny week and we have continued to make the most of the lovely weather and our fantastic school grounds. We try to get outside and learn whenever possible and this week in Geography we used our outdoor classroom whilst creating maps of our school grounds. The children enjoyed this so much and it was great to see them looking up and around them whilst working to help them plot different parts of the school onto their maps.

We were also lucky enough to go out and play some parachute games altogether. Although wildly exciting, it was fantastic to see the children really come together and work as a team to play a variety of games. It's clear to see they are maturing and getting ready for Year 2!

In English this week we have continued our unit of work on traditional tales with a twist. The children have innovated a different ending to 'Trust Me Jack's Beanstalk Stinks!' to create and plan their own versions of the story. We will start writing our stories next week.

In maths we have been looking at measuring length and in particular using the language associated with length - longer, longest, higher, highest etc. Some of the children found this tricky so please practise if the opportunity arises at home.

In Science we are continuing with our learning on plants. Some of our plants are growing very well and it's always exciting to come in on Monday morning and see how much more they have grown over the weekend!

Next Week

In Maths we will start looking at capacity and the language associated with it.

In English we will start to write our own versions of Trust Me Jack's Beanstalk Stinks with our new, innovated endings.

Home Learning

Please check Mathletics and complete any outstanding tasks.

Everyone has recently been assigned new books on Bug Club so please supplement your child's reading with these books.

Spellings will be sent home this week as normal.
