What have we been learning?

Over the last 3 weeks we have been taking part in the virtual Winter School Games, we have all loved the challenges we have done to date. Here are some action photos!!!

In English, this week, we used our ELLI power of imagination to imagine that we were Lily and we started our diary entries as if we had just spent a day in the garden. We remembered that as we were Lily we needed to write in the first person.

In Maths, we have continued to learn different methods including partitioning and an unmarked number line to answer addition questions. Although many of us found these methods tricky, we have showed super perseverance to use them.

In Geography we used our homework and told each other through a speaking and listening activity, all we had found out about India. The children all had some fantastic facts and we will be carrying on using them next week. The homework was so brilliant, we have made a great display in the classroom.

Next Term

Following on from our Geography and all the facts we have found out about India, we are now going to put this information into a PowerPoint over the coming weeks. Once our PowerPoints are finished, we will be uploading them to Google Classroom for you to see!

In Maths, we will be moving onto looking at subtraction. We will be subtracting ones from a two-digit number and subtracting tens from a two-digit number. We will be using tens frames, numicom, dienes and other equipment to help us with our subtraction!

In English, we will be continuing with our diaries in the role of Lily, we will be trying to add feelings and thoughts as we write our diaries.

Google Classroom

Please do look on Google Classroom every week for the home learning. We are using our home learning this term to prepare the children for the upcoming Phonics Screening Assessment, so the children need to practise reading those real and nonsense words.

This week in class, all of the children were tested on their common exception words. It was brilliant to see how many more words they knew from Term One. Those children who still have some words to learn, will now have their new common exception words on Google Classroom.
