What have we been learning?

This week, in Maths, we have been mastering solving problems using column addition and subtraction. We have been thinking about how sometimes, we may need to carry or borrow numbers to make the question work. We have shown our answers using concrete resources, pictorial representations and written.

In English, we wrote diaries in the first person as if we were Lily, we wrote all about the plants we met as we wondered through the garden.

In Computing, we made a start on our mini outcome "Where in the world?" where we are making an information PowerPoint all about India and the interesting facts we have found out.

Next Term

We will be continuing to construct our PowerPoints on India this week, and we will be learning how to input a picture into them.

In English, we will be writing newspaper reports about the Holi Festival that takes place in India. We will be watching a fantastic video of the festival taking place and will then become journalists to report on it.

We will also be rehearsing our Christmas production in preparation to show you all very soon!

Other News

The children were set Mathematics activities last week, please make sure that these have been completed.

All of the children have also been issued a bug club book that needs to be read, let us know when it has been completed in the home school book so we can include it as 1 of the 5 in our reading challenge.

Don't forget to bring your glass jar with a lid into school on Monday.

Also if you have been asked to send an outfit in for the play (you would have had a separate note), ensure that these are in school on Monday 27th November.
