

Jet Class Newsletter

08.02.19

What have we been learning?

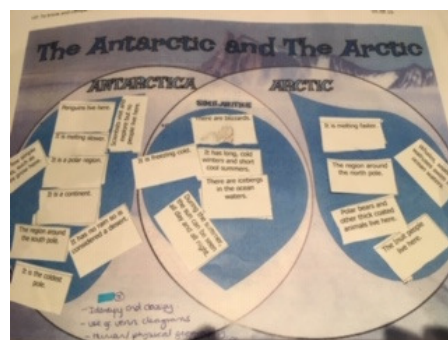

It's been another busy week in Jet class. We were lucky enough to have Autumn and her daddy come into class to show us their amazing moving Lego T-Rex. The children loved seeing how it worked and finding out how they made it.

In English we have been writing the problem and resolutions to our story about Albie. They are sounding amazing! We have been including question marks and exclamation marks, noun phrases, conjunctions and commas.

In maths we have been developing our division skills, focusing on sharing equal groups and using our related multiplication facts to solve challenges and problems. In daily 10 we have been testing our 2, 5 and 10 times tables. Your child has these tables in their home learning books to practice at home. They will need recall these facts randomly and fluently. Please continue to practice daily at home.

In geography we have been learning about the North and South poles. We have been finding out lots of interesting facts and using these to create a Venn diagram identifying the similarities and difference.

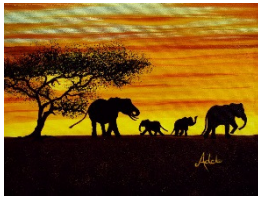

Next Week

We will be continuing to develop our multiplication and division skills focusing on the 2, 5, 10 and 3 times tables.

You can support your child at home to learn their times tables using the link below.

In Art we will be continuing to explore different pastel techniques to begin to create our sunset back grounds.

Important information

Please can you return your Berkeley Castle permission slips ASAP to the school office.

Dates for your diary

Bedtime stories - Thursday 28th March (letter to follow)

Berkeley Castle Whole School trip – Thursday 21st March

We are finding that many children do not have full P.E kits in school every day. Please can you ensure that your child has their kit in school including a warm jumper/joggers for outside sessions.
