Jet Class Newsletter

14.01.22

What have we been learning?

Another busy week in Jet Class. We wrote amazing character descriptions describing our new friend the alien Hoctopize using adjectives and conjunctions.

We have explored 2d and 3d shapes and their properties in Maths and started to design our hand puppets based on the toys from our class text 'Toys in Space'. We explored a variety of puppets, discussing the materials they were made from and how we thought they were joined together.

We had a lovely evening last night at our star gazing event. We shared space stories, learnt a song about star constellations and enjoyed hot chocolate and biscuits outside searching for stars. We also think we spotted the Hoctopizes spaceship flying across the sky!

Next Week	Home learning
We will begin our new mini outcome 'What happens next?' We will be orally retelling our class text 'Toys in space' using actions and phrases from the story. In maths are will continue our learning about 2d and 3d shapes. In Geography will be leaning about the World's oceans and continents and facts about the UK. Science next week will be investigating, identifying and naming sources of light.	Matheltics learning has been allocated today focusing on 2d and 3d shapes. Please support your child to complete the learning. Please continue to practice counting in tens forwards and backwards. A resource sheet has been added to Google classroom to complete.
