What have we been learning?

On Tuesday, we had a wonderful experience learning Chinese Ribbon Dances. We all loved exploring how to use the ribbons and the different movements we could make. Together as a class we created a sequence using our ribbons.

In science, we have been naming different common materials and identifying the difference between an object and what the material is that it is actually made from.

We have moved onto our next class book, Iggy Peck Architect, and have created our storyboards, to help us with our writing next week.

Next Week

In maths, we will be moving onto look at fractions. We will be looking at $\frac{1}{2}$ and $\frac{1}{4}$ of shapes and quantities.

Other News

On Wednesday 26th February, we will be visiting the church as part of our RE learning.

In English, we will be using our storyboards to create a narrative piece linked to our new book Iggy Peck.

In science, we will be exploring the physical properties of the materials that we have investigated this week.

We will need volunteers to walk to the church. If you are available on the 26th in the morning, please let us know asap, as we require a certain number of adults for our visit to happen.

In Maths, we have been exploring money, this is an area where it would be great if you could continue looking at with your children at home. When you go to the shops, could they help you find the correct coins to pay for an item? Can they help you to see how much change might be given?
