## What have we been learning?

This week, we have recapped all our knowledge of 2D shapes and thinking about the properties of these shapes. We also tried to use mathematical language when talking about the shapes. Ask us and see if we can tell you what the words vertices or quadrilateral mean?

We have had a great week in English working on our poetry skills. We have written acrostic Christmas poems. We also wrote Christmas riddles where we had to write clues about an object or a person linked to Christmas, but our clues could not reveal the answer. We then practised using our clear loud speaking voices to read our clues out, to see if our friends could guess! We certainly had lots of fun!

On Monday we finished our mini outcome "Where in the world?" The children were amazing at creating their own PowerPoints from scratch adding text, pictures, changing the colour of their font, and choosing their page design and layout. Please see below with information about how you will be able to view their PowerPoint.

### Next Term

Our new project for terms 3 and 4 will be

*'What discoveries will we make?'*

We will be having our 'Wow' morning on Wednesday 6<sup>th</sup> January. Our Wow will be a surprise, but your child will need to bring a warm coat, hat, scarf, and gloves with them (Imagining they are off to the Arctic!).

Google Classroom

On Google Classroom, you will find your child's PowerPoint, please allow them the time to share their PowerPoint with you at home. Once they have shared it with you, if you could write a small message back in the comment box about their learning, we will print this out and add it into their journal with their learning.

### Other News

Each child has 3 books in their book bags for the holidays. Do not forget there are always books on Bug Club if you need them.

Finally, we both wish you and your families a very Merry Christmas and a Happy New Year. Thank you also for our very kind Christmas gifts.
