

Jet Class Newsletter

14.05.2021

Jet class have been amazing this week using their ELLI learning powers especially their power of curiosity and making links. They have all completed their detailed nonfiction report writing about life in the Victorian times. They used sub headings to organise their interesting facts and wowed us with their conjunctions and grammar.

We have been super mathematicians exploring fractions of shapes, objects and amounts and applying our skills to problem solve and reason.

In art we have been researching the famous artist Claude Monet who we are focusing on for our mini outcome 'What's in the vase?' We have been developing our pastel skills exploring different techniques and using view finders to draw section of Monet's sunflower painting.

We are improving our multi skills every week in P.E, we have developed our balancing and coordination skills by completing various challenge cards.

Next week

English - We are going to be planning our own adventure story for Peter Rabbit. We will be creating our own character and a planning a problem for the two friends to overcome.

Maths - this week we will be building on our fractions skills. We will be looking at $\frac{1}{3}$ of shapes, objects and amounts.

In Jigsaw we will be learning more about relationships, talking about trust and the people around us that we can trust.

In art we will be starting to draw our own sunflower pictures using pastels in the style of Claude Monet to create our classroom display 'What's in the vase?'
