10.01.2020

### What have we been learning?

Welcome back to the new term. We hope everyone had lovely Christmas break, we would like to take this opportunity to thank you for all your generous Christmas gifts. They were very thoughtful and we loved them all.

We loved our WOW day on Wednesday when we became scientists for the morning. We used our senses to carry out a variety of experiments and activities. We went on a sound walk, made our own telephones, tasted different flavours, smelt a variety of smells and explored objects just using our hands.

We have also been learning about the body in science, we draw around each other and labelled the body parts we knew. As part of our art/DT learning and mini outcome 'Can we bring back the weave? We have be finding out some local history by researching Alexander Hosea and weaving. This in preparation for us making our own weaving using different materials.

### Next Week

In English we are going to linking our history learning by writing our own personal timelines.

In maths we are consolidating our understanding of missing numbers for addition and subtraction and applying our knowledge to solve word problems.

In Art/DT we will be creating our own willow weaving with the help of Mrs Shovelton (previous member of staff).

### Home learning

In your child's home learning purple book we have asked if you could send your child into school with 4 photographs of them (baby, toddler, preschool aged/reception, recent). We will photocopy them and send them home again.

They will need to be in school by Tuesday 14<sup>th</sup> January.
