What have we been learning?

We have had a really lovely week in Jet Class. The highlight was our scooter training on Wednesday! The session started with a virtual teaching session about how to be safe and use our scooter. Then we went out in small groups to put our new skills into action. The children all listened very carefully to the instructions and performed the challenges well.

In Science this week, we have been learning all about the basic needs of animals including humans. We played a great game where we thought like a scientist and decided if the picture cards were showing a need the animal had to have in order to survive or just a want that would be nice to have. This led to some very interesting and mature conversations between the children.

Through Maths, we have been exploring odd and even numbers. We were looking at patterns again to be able to recognise within a 2 digit number if it is odd or even. We now know that to decide if a 2 or 3 digit number is odd or even, we need to look at the last digit to help us decide. Ask your child what numbers would need to be on the end for it to be odd? What would it need to be for it to be even?

Next Week

We will be coming to the end of our first PE unit where we have been developing our throwing and catching skills through a range of games. The children will be evaluating the new skills and techniques they have developed since September.

In Science, we will be learning about the life cycle of a Jungle Tree Frog and describing the different stages and what happens at each stage.

In Maths, we will be consolidating our knowledge on Number Bonds.

Our wonderful jungle stories are now nearly finished and we will be using next week to make any final edits and share them with our friends in class.

Other News

Spellings will continue to take place on a Wednesday. The children have made a great start with these- Well Done.

HOME LEARNING

The last few weeks we have had a focus within our home learning on Maths. For the next two weeks, we are going to have a comprehension focus with our home learning. It is important that the children develop their comprehension skills this year and that they learn the skills of how to take the information out of a text to answer the questions. The rule for when we answer questions in comprehension is that they have to be answered in a full sentence!

All home learning can be found weekly on Google Classroom. If you have not had chance to complete any past home learning, we never remove it, so there is a chance for it still to be completed.
