

## Jet Class Newsletter

13.03.2020

### What have we been learning?

It has been another busy week in wonderful Jet Class, we were very lucky to have a visit from Mrs Rehman's brother who is a real pilot as part of our week learning about the Wright Brothers and planes. We loved hearing all about his exciting job and we asked him lots of curious questions. I think we have some aspiring pilots in Jet Class.

We have completed our Biographies on The Wright Brothers recalling all the interesting facts we have learnt. We used sub headings to organise our facts, conjunctions to extend our sentences and tried really hard to remember -ing and -ed verb endings.

In maths we have moved onto multiplication counting in tens, we have been grouping mathematical resources, creating our own arrays and using these to solve challenges and reasoning problems.

### Next Week

Our famous focus will be on Amelia Earhart who was famous for being the first female aviator to fly solo across the Atlantic Ocean. We will be researching her successes and writing a newspaper report retelling the day she flew.

In DT we will be peer critiquing each other's flying invention designs, then using these suggestions to redraft with improvements. We will be developing our sketching skills, using clear labels on our design and listing the materials we need to construct our inventions.

In maths we are going to be developing our multiplication skills counting in 5s.

### Project Outcome

We would like to invite you into Jet class to help your child construct their own flying invention on **FRIDAY 27<sup>th</sup> MARCH 2-3.30pm.**

We will be busy over the next few weeks exploring existing products, testing flying inventions and carefully designing our own flying creations ready to make.

### Home learning

The children have been set a three week home learning challenge to construct their own hot air balloon and bring it into school by 24.03.2020 for their music performance.
