

## Jet Class Newsletter

02.05.19

### What have we been learning?

We had a great time at the multi skills event at KLB. The children enjoyed learning many new sports skills and meeting other children from local primary schools. Thank you to our parents volunteers for coming with us.

In science, we have planted our first bean seeds, which we will be observing over the next few weeks, thinking about what they need to grow and survive

Jet Class had our first recorder lesson on Tuesday and we loved it. The children learnt the note 'B' and cannot wait until their next lesson.

### Next Week

In maths we will be continuing our learning about 3d shapes and their properties.

In DT we will be designing our own patchwork square for the class patchwork quilt.

### Home learning

Maths home learning will be coming home this week focusing on 2d and 3d shape properties and lines of symmetry.

We still need off cuts of materials to make our patchwork quilt, please send them into school if you have any at home.

We know that the children love to bring things in from home to show but we will only be reviewing learning from home linked to our topic of the Queen and the Royals this term. Thank you for your understanding.
