What have we been learning?

2.2.19

This week in English the children have been writing stories based on 'How to grow a dinosaur' applying commas in lists, question marks and exclamation marks. The children have been persevering with their letter formation and handwriting and we're really impressed with the effort they are putting in.

In Maths we have been looking at arrays and using these and other drawings to solve maths problems and reasoning problems.

Daily 10

We have been spending time this week on our daily 10 revising our 2 times tables and working on our 5 times table. We have discussed strategies we use and we have gradually got faster. It is great to hear children have been practising at home and they are so proud when they can work out the answers quickly. This has really been helping them with their multiplication.

In science this week we have been looking at habitats and why animals live where they do: thinking about their food, shelter and water.

P.E.

Now we are half way through the year it may be time to look at your child's P.E. kit to check that trainers, daps and clothes still fit and are in there!

Next Week

We will be continuing our stories, applying all our learning.

In maths we will be moving on to looking at division and grouping to find the answer. We will be making links with our multiplication during our daily 10.

Important information

Please continue to bring in any mathematics certificates for your child to share with Mrs Williams.

Mrs Rehman (Miss Pursey) will be back from maternity leave on 13th February. I know she is very excited about getting to know all the children and families.
