Pearl Class Newsletter

In Science this week, we were learning about why we have night and day, looking at the rotation of the Earth. After practising moving like the Earth and noticing how much of the 'Sun' we could see in different positions, we watched changing shadows on the playground, using compasses to record the direction.

Our dance this term uses volcanoes as inspiration. We have been building up our routines, creating sparks, bubbling lava and explosions.

Reminders:

- Meet the Teacher PowerPoint with key information for the year is on Google Classroom
- Reading 5 times a week
- Mathletics
- Spellings
- TTRockstars
