Pearl Class Newsletter

It has been a busy first couple of weeks beginning our project learning. We have been learning about different climate zones around the world and looking at the similarities and differences between the Arctic and Antarctic.

As part of our English learning over the coming weeks, we will be learning about climate change, global warming and the impact on the Polar Regions. We will be channelling our inner David Attenborough and Greta Thunberg by writing and delivering persuasive speeches which will be filmed using a green screen.

In Maths we have been focusing on place value: reading, writing, ordering and comparing numbers up to 1,000,000 and looking at negative numbers. Next week we will be revising and then expanding on our knowledge of rounding numbers.

Home learning:

- Read at least five times a week
- Mathematics
- TTRockstars – it has been brilliant to see greater engagement this week. Times tables are vital to many other parts of maths learning. It is therefore important that they are learnt and practised regularly.
- Project home learning – set on Google Classroom – due 15th October.
