

# Pearl Class Newsletter

11.05.18

Last Friday we spent the morning doing some pedestrian training out on the roads. We discussed the best places to cross the road and also practised crossing at difficult places (between parked cars or at a junction). It took us a long time to get safely across the busy high street but it was good practise for when we are out and about in the village!

In English this week we have been writing explanation texts about the water cycle using technical language and applying our Year 5 grammar. Next week we will be exploring different styles of poetry. In Maths we have been solving problems involving time and timetables before moving on to measurement next week.

## Reminders:

- Continue to practise times tables – remember to learn the division facts too  
e.g.  $12 \div 4 = 3$
- Read at least five times a week
- Practise spellings
