

Pearl Class Newsletter

25.05.18

This week we had a visit from National Star, a charity who enable young people with disabilities to realise their potential through education and personalised learning opportunities. They led an assembly for the whole school before we took part in a workshop along with Year 6. During the workshop we were all given the chance to experience what life would be like for a young person with a disability and considered ways in which we could raise money for the charity. Here we are experiencing communicating without speaking, building Lego towers whilst blindfolded and getting dressed using only one arm.

In English this week we have been developing our own literary maps, characters and settings for our stories which we will begin writing after half term.

In Maths we have been practising our measuring skills, converting between different metric measures as well as introducing the comparisons between metric and imperial measures.

Reminders:

- Continue to practise times tables – remember to learn the division facts too e.g. $12 \div 4 = 3$
- Read at least five times a week
- Practise spellings
