Pearl Class Newsletter

This week we have been inventing our own 'Fantastic Beasts' after exploring and drawing some from the world of Harry Potter. After drawing our beasts, we thought about the habitat, diet, history and special skills or unique features of them, ready to write a report on them next week.

In maths this week we have learnt how to calculate missing angles on a straight line (180°) and in a whole turn (360°). We also spent some time revisiting activities on Mathletics where scores were lower than 70%.

On Tuesday afternoon, we took part in an online pedestrian training session where we learnt about how to keep safe when crossing the road if different places.

Home learning:

- Read at least five times a week
- Mathletics – complete set activities each week
- TTRockstars
- Spellings – we have started to look at some different spelling rules and patterns and a list of spellings with the suffix -cious were sent home on Tuesday to be tested next Tuesday.
