

Pearl Class Newsletter

15.06.18

This week in English we have continued to write our own stories, some of which are already at least 4 pages long! It has been wonderful to see such enthusiasm for writing and great application of Year 5 grammar skills.

In Maths we have been revising multiples, factors and prime numbers, applying our times tables knowledge.

As part of our project learning, we have been creating our own moving vehicles using Lego Wedo and computer programming. It has been a huge challenge as we have only learnt how to make parts of models move previously! Perseverance, teamwork, curiosity and creativity were all evident!!

Reminders:

- Continue to practise times tables – remember to learn the division facts too
e.g. $12 \div 4 = 3$
- Read at least five times a week
- Practise spellings
