Friday 8<sup>th</sup> November 2019

WORD OF THE WEEK  
**dependable**

## ENGLISH :

We have started this week with a grammar and vocabulary focus and we have been investigating challenging words and their meanings. In class ,we have created a vocabulary wall and it is envisaged that it will be an interactive one where the children add to it . Key words we are using are SYNONYM and ANTONYM .

## MATHS

We are continuing with consolidating written claculation methods but now we are asking the children to apply their knowledge of addition and subtraction by solving two step problems . This is proving to be challenging for most of the children so we will be continuing for a little time longer . If you would like to do some pre learning, we will be moving onto long muliplication sometime next week .

## GEOGRAPHY

We have been learning about Mexico and looking at maps and keys to find out about the physical features of the country and plotted mountain ranges ,volcanoes, rivers etc on blank maps . The children have been fascinated with the information that they have discovered in the atlases rather than using Google!
