

# Pearl Class Newsletter

23.02.18

This week in Maths we have been learning about 3D shapes and their nets. We spent a morning exploring how various 3D shapes can be made and created a range of successful nets. Next week we will be finishing our learning on shape by learning about translations and reflections.

In English we have been finding out more about Boudicca and looking at the features of a biography text in preparation for writing our own biographies of Boudicca.

To begin our Science topic, Animals including humans, we have been discussing what we already know about the changes a human experiences from birth to old age and asking questions to help us find out more. We will be continuing this over the coming weeks, including learning about puberty.

## Reminders:

- Continue to practise spellings and times tables – we are doing fantastically well with these!
- Read at least 5 times a week
- Kilve Court forms

Project final outcome: **Wednesday 21<sup>st</sup> March 9.30 – 11am.** We will be sharing our 'Horrible Histories' style films and other learning from our 'Were the Romans Really Rotten?' project.
