

Pearl Class Newsletter

07.09.18

We have had a wonderful start to the new school year being introduced to our new project 'How far can you go?' learning all about the Earth and Space. On Thursday we launched our project with a fact finding mission in the 'Solar System' (otherwise known as the school field)! We visited all the planets and found out a lot of information about each one.

Next week, we will begin to learn about the Solar System in more detail and will begin working in small groups to plan a Scratch based project on a specific planet.

In English we are reading a text called 'Curiosity: the story of a Mars rover' which tells the story of the Curiosity rover's journey to Mars told from the point of view of the rover.

In Maths we are focusing on place value with numbers up to at least 1,000,000.

Times Tables: This year, I have set the class the challenge to learn all of their times tables and be able to recall them quickly by the end of the year. Please can you remind your children to practise these as often as possible.
