Friday 31st January 2020

This week :

Maths : We have been learning how to convert improper fractions into mixed numbers .The children learnt how to represent this conversion through diagrams first and when they had grasped the concept they were able to do so without pictorial support .We have been able to quickly move on to adding fractions with different denominators . This concept can be quite tricky but I am confident that in the coming days most children will be able to find common denominators independently.

English : We have been planning how to write a persuasive text . This learning has been linked to environmental issues regarding single use plastic and the impact this has on the oceans and sealife. The children have been horrified by some of the facts they have researched and are truly fired up to make a difference -watch this space because they have some interesting ideas. Here are some photos of them working in groups to plan their key arguments and evidence them.
