

Opal Class News

How has our week been?

We finally made it! Well done us! This has been a very busy half term and the children have adapted well this week to a few changes. We were due to have our SARI workshop on Wednesday but due to illness, this was cancelled. The children continued with their normal learning, delving into Science where they studied reversible and irreversible changes. In English, we have been writing our leaflets up as well as learning about the explanation text genre. In Maths, we have been whizzing through fractions. The children have found some concepts very challenging and we shall revisit these, next term.

Key dates coming up:

On Tuesday of the first week back, we have a tennis taster session. This will be on their PE day so the just need to wear their kit.

Those who wish to join the creative club will need to submit piece of writing by Wednesday 21st February

Coming up next week Learning focused	Way to support at home (home learning)
<p>We shall be continuing with fractions in Maths.</p> <p>In English, we shall be learning about the cohesion of a paragraph.</p> <p>We shall be reviewing errors from the year $\frac{3}{4}$ spelling list that the children are still struggling with.</p> <p>Mayan architecture</p>	<p>Carrying out fraction learning on Mathematics or finding practical games to learn about mixed and improper fractions would help.</p> <p>Perhaps look through their reading book for conjunctions and fronted adverbials which join one sentence to another? What impact does it make?</p> <p>Challenge your children to a spelling game. Give them random words from the year $\frac{3}{4}$ list and ask them to spell them.</p> <p>Perhaps the children can research and look up some of the Mayan temples and palaces and compare them to the Mayan farms?</p>
