

Ruby Class News

Our first week of term 1 has flown by and we are learning to adjust to life and learning for year one. It is lovely to see how the Rubies are adapting quickly – they are picking up the fast-paced routine really well.

In **English**, we have taken it slowly and we have spent our time assessing the children's letter and number formation. In **Maths**, we have been learning how to sort objects, recognising the criteria of how we are choosing to sort. I have also introduced daily reasoning and problem-solving for the children. Though this is new to them, it is wonderful to see how well they are embracing the new style of learning. We have started our **Science**. The children have been classifying animals into 3 different groups based on what the animals eat (Herbivores, Carnivores and Omnivores). We discussed the difference in the animals teeth and the purpose to those teeth. We have also started Geography where the children are learning about human and physical geographical features.
