

Ruby News

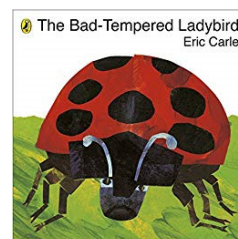

Last week the children replanted their beans outside and the caterpillars have been transferred into their butterfly house. When the children return from half term we can release the butterflies into the wild.

The children explored the style of Lucy Arnold and the use of water colours. We will continue to explore her style of painting and layering of pictures like collage. We also focused on our scientific drawing skills of insects, what talented children they are!

In the environment, the children have been exploring different ways to link their maths, like counting in twos, fives, tens, or shapes, or doubling and sharing. We shared *The Bad-Tempered Ladybird* book and the children are keen to help the ladybird learn how to share with numbers.

The children have been amazing this term with reading at home and they decided as their treat they wanted a treasure hunt. They had to find different pictures of insects with letters on to spell out a word! They were brilliant using teamwork.

Over half term it would be great for the children to continue to read and practise writing tricky words they are familiar with to transfer into their writing. In addition, we will be learning more about healthy lifestyles in the new term with a twist!

I hope you have a fantastic break!

Miss Tyler 😊
