

Ruby News

This week some of the children have been sculpting their own caterpillars using plasticine. They are using their hands and tools to create the details.

An update on our beans! They are growing well and the children are starting to discuss how tall or short they are, which way they are facing, and what they need to grow.

Another update! Our caterpillars are getting bigger! The children are observing them closely and taking pictures along the way to keep a photographic journal. We are looking into the life cycle of caterpillars and plants.

We have gone off on a tangent after reading a story together about endangered animals! It would be great if the children could find out about an endangered species to share with the class, they can present it in any way they like; video, writing, talking, pictures, model etc.

I have put a journal date share in the diary for **Monday 20th May @ 2:15-3:15.**

Miss Tyler 😊
