Learning

We have been very excited about our swashbuckle and sharing our journals with our grown-ups. We have polished our singing performance ready and talked a lot about how to celebrate. We have also made time to use our maths skills. We have had a pirate number hunt outside to check our linking of calculation skills and a pirate parrot hunt to link number bonds to 10. In the building area we have been building cubes and cuboids of different sizes to explore properties. At home you can support recall of pairs of numbers that make 10 and talk about 3D shape names of cube, cuboid, cone, sphere to help.

Our sea themed day was so much fun!

Walk to School Week

We will be joining in with the whole school focus on walking to school next week. The emphasis is on keeping fit and healthy so scooting and bike riding are also encouraged. If you need to drive the idea is to park a little bit further away. There will be activities in the red book to do as you walk.
