

Topaz News

This week

Santa managed to find time to pop onto a Teams meeting to talk to us on Monday. He asked us to make him some new maps because his sat nav was broken on his sleigh. We linked our phonic learning to write the words on our maps and solved that problem. Later in the week we needed to find the right sort of carrots for the different journeys that the reindeers need to make. We used our language of length and our counting to sort the carrots out.

We enjoyed watching ourselves in our nativity play and hope that you have enjoyed watching it too.

As a special treat we watched a pantomime on the screen that was made for our school.

Finally, we played some games together and had a party.

It has been a brilliant term but we are all ready for the Christmas holidays now.

Phonics and Reading

I have had a look at our individual skills this week so I will send some next steps via Evidence Me in the next couple of days.

Items needed for terms 3 and 4

We will be building models with recycled items so please can you save some boxes and tubes that are smaller than cereal boxes. We will put a box out for these and leave them for 72 hours when they come into school.

There will also be a modelling challenge for the holidays to start off our new project. I will send the details through.

Have a wonderful Christmas and New Year and I will look forward to welcoming you all back in January.

Sally Windmill
