Topaz News

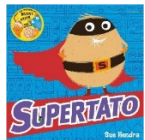

Dear All,

It has been lovely to catch up with you all and share your child's successes in parents evening.

Learning

We made the most of the snow this week by linking some snowman building with measuring and scientific thinking. We went outside to build some snow people then measured them with cubes. We watched through the day to see how our snowperson was changing.

The Supertato books have been very popular this week. The Evil Pea has been challenging us to link our mathematical skills. He has even stolen Supertato and we needed to write a crime report for the local police because they were too busy to come and help.

At home learning to quickly recall pairs of numbers that make 10 will build mathematical skills. We have used these links:

New project

We have an exciting new project planned that will take us under the sea. **Over the holiday, we want the children to make a boat to bring in on the first day back (10.4.2018).** Our wow start will be to see if our boats will float so they need to know that they will be going in water and they might get soggy!

Have a wonderful Easter break. Kind regards,

Sally Windmill
